## **DETAILED ACTION**

### ***Response to Amendment***

1. Claims 1-14 are pending. The amendments to claims 1,4,7,8,10 and 14 have overcome the objections for formal issues set forth in the previous office action.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ganesan et al. (USPGPUB 2001/0033880A1) in view of Bishov et al (US#3,852,502) in further view of Dake et al. (US #5,424,082). Null (The antioxidant vitamin) is taken as evidence.

4. The ground of rejection is maintained as set forth in the previous office action.

### ***Response to Arguments***

5. Applicant's arguments filed 6/1/09 have been fully considered but they are not persuasive.

6. In response to applicant's argument that Ganesan is silent as to whether the process controls and prevents off flavors from forming in tea, a recitation of the intended use of the claimed invention must result in a structural difference

Art Unit: 1794

between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In this case, as Ganesen discloses the method steps of contacting fermented tea material with an antioxidant, one having ordinary skill in the art would expect this process to be capable of performing the intended use of preventing off flavors. Further, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

7. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Bishov is cited to disclose the suitability of emulsions of BHA for use as antioxidants in food products (for example claim 1). Though Bishov does not explicitly disclose tea, one having ordinary skill in the art at the time of the

Art Unit: 1794

invention would find it obvious to substitute one antioxidant compound known to be suitable for use in foods for another. While the examples in Bishov disclose using the product with corn oil, the invention is suitable for use generally in food products that are subject to oxidation (col. 2, lines 15-22).

### *Conclusion*

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
